
Management Information Systems

Contractor shall ensure the existence and operation of an information system within their organization. It shall have the ability to be used internally, collect and report data as required by North Sound BHO. This data shall be useable as management data for audit purposes and contain sufficient information to track termination from North Sound BHO services. (42 CFR 434.53)

Contractor shall notify North Sound BHO of any change to their information system at the time planning begins for implementation that will have any effect on the data submitted to or otherwise required to be collected by North Sound BHO. Prior to implementing changes to production systems, Contractor shall conduct testing as noted below.

Contractor shall participate in North Sound BHO's Consumer Information System (CIS) Workgroup and information systems policy groups when requested by North Sound BHO.

Contractor shall comply with North Sound BHO policies and procedures regarding quality, accuracy and data reporting.

Periodically, North Sound BHO may receive requests for information from Centers for Medicare and Medicaid Services (CMS), the legislature, Division of Behavior Health and Recovery (DBHR), etc. that may not be readily available in North Sound BHO's CIS and require collection of this information from Contractor. Contractor shall ensure that requested information is received in a manner that will allow North Sound BHO to make a timely response to these inquiries.

North Sound BHO CIS DATA DICTIONARY

North Sound BHO's CIS Data Dictionary can be found online at <http://nsmha.org/datadict> . This set of documents describes the data, format and content that is to be electronically submitted to North Sound BHO.

1. Contractor shall provide all applicable data as described in North Sound BHO's CIS Data Dictionary.
2. Contractor shall participate in North Sound BHO's decisions related to North Sound BHO's CIS Data Dictionary changes.
3. Contractor shall implement changes made to North Sound BHO's CIS Data Dictionary within 90 days from the date of published changes. In the event that shorter timelines for implementation of changes are required or necessitated by either a court order or agreement resulting from a lawsuit or legislative action, North Sound BHO will provide as much notice as possible of the impending changes and provide specifications for the changes as soon as they are available. Contractor will implement the changes required by the timeline established in the court order, legal agreement, or legislative action.
4. Contractor shall implement changes to the content of national standard code sets (such as CPT, HCPCS, Place of Service code sets) per the instructions and implementation

schedule or deadline from the issuing organization. If the issuing organization does not provide an implementation schedule or deadline, Contractor shall implement the changes within 90 days.

TESTING

Prior to the implementation of any change which has an effect on the data submitted to North Sound BHO – regardless of whether as a result of North Sound BHO’s CIS Data Dictionary changes or Contractor data quality improvement activities – testing must be conducted and successfully completed.

1. Prior to moving changes into production systems, Contractor shall submit test batches of the changes to North Sound BHO’s CIS Test System.
2. Test batches must be generated from Contractor test system and contain a variety of different scenarios related to the changes.
3. Depending on the testing being done North Sound BHO will provide a standard batch report and/or detailed analysis of the test batch identifying issues, if any, to Contractor.
4. Once North Sound BHO approves testing of batches, Contractor will be allowed to move changes into production systems. North Sound BHO approval will be given after a test batch produces no errors or other mutually agreed upon amount of specific errors.

North Sound BHO CIS DATA EXTRACT

North Sound BHO shall generate on a daily basis a data extract of Contractor data in North Sound BHO’s CIS. This data extract will consist of pipe-delimited text files. File names will coincide with the ‘Alt Tx Name’ as found on North Sound BHO’s CIS Data Dictionary Transactions page. Additionally, there will be a file named ‘OutstandingErrors.txt’ that will contain all resolvable errors that have not been resolved by Contractor. These files will be contained in a ZIP file named ‘Data_Extract.zip’ and will be placed in Contractor ‘Outbound’ directory on North Sound BHO’s SFTP site.

North Sound BHO has produced a Microsoft Access database that will import the unzipped data extract text files. This database contains various data cleanup reports, ability to look up Contractor client data in North Sound BHO’s CIS and ability to create various reports. North Sound BHO will periodically update this database and increment the version number accordingly. North Sound BHO shall place this database in Contractor ‘Outbound’ directory on North Sound BHO’s SFTP site.

Contractor shall, on a daily basis, download the ‘Data_Extract.zip’ file and any new version of the Access database. Once the ‘Data_Extract.zip’ file has completed downloading, Contractor shall extract/unzip files and use the Access database to import the extracted files. Once new data extract files have been imported into the Access database, Contractor shall monitor and act upon the data cleanup reports contained therein.

TIMELINESS

At a minimum, Contractor shall transmit data to North Sound BHO's CIS once per week except as noted below.

EMERGENCY SERVICES

The provision of any emergency service shall be collected by Contractor's information system and submitted to North Sound BHO's CIS within 24 hours from the completion of that service. Emergency services are those that would be reported via the following transactions:

1. CDMHP Investigation (160.02)
2. ITA Hearing (162.02)
3. Outpatient Services (120.03) as related to a CDMHP Investigation or ITA Hearing.

ROUTINE DATA SUBMISSION

Required data must be reported by the 5th calendar day of the close of each calendar month in which the event occurred. For example:

1. An encounter that occurred in January shall be submitted by the 5th of February.
2. An Authorization Request where the requested start date is in July must be submitted by the 5th of August.
3. A change in a client's address that occurred in March must be reported by the 5th of April.

ERROR RESOLUTION

After North Sound BHO processes your submitted batches, a batch report will be generated that will show each record submitted per North Sound BHO's CIS Data Dictionary, if it successfully passed validation rules and any errors that may be applicable to the record. Validation rules applied to submitted records can be found in North Sound BHO's CIS Data Dictionary. This batch report will be made available in Contractor 'Outbound' directory on North Sound BHO's SFTP site.

Certain errors may appear in your batch reports that are not able to be corrected. Corrections to non-correctable errors are not expected to be acted upon and will not show up in other error-related reports. Some of these errors include:

1. Requesting to delete a record that does not exist in North Sound BHO's CIS.
2. Submitting a service that is over one (1) year old.

Contractor shall make corrections in their data system for any record that errors and submit the corrected data to North Sound BHO in a new batch within 10 calendar days of the batch report being generated. Contractor shall maintain the originally submitted record key when submitting corrections.

OUTSTANDING ERRORS

Contractor shall ensure sufficient resources are made available to Information System and/or Data Integrity staff to correct any errors that are present on the Outstanding Error report. The Outstanding Error report will be generated daily and will be included in the Data_Extract.zip file in Contractor 'Outbound' directory on North Sound BHO's SFTP site. Errors on the Outstanding

Error report that have been outstanding for more than 10 calendar days will be an indication, in part, of non-compliance with error resolution timelines.

ADDITIONAL DATA CLEANUP REPORTS

North Sound BHO will routinely generate additional data cleanup reports that will be provided to Contractor. Contractor shall go through said reports within 10 calendar days and do one of the following:

1. Make corrections in CMHA information system then submit corrected data to North Sound BHO's CIS; or
2. Notify North Sound BHO IS/IT Administrator that the record(s) on the cleanup report is/are correct.

BUSINESS CONTINUITY AND DISASTER RECOVERY

Contractor shall create and maintain a Business Continuity and Disaster Recovery Plan (BCDRP) that ensures timely reinstatement of the CIS following total loss of the primary system or a substantial loss of functionality. The plan must be in written format, have an identified update process (at least annually) and a copy must be stored off site.

Contractor BCDRP must address, at a minimum, the following:

1. A mission or scope statement;
2. An appointed Information Services Disaster Recovery Staff;
3. Provisions for backup of key personnel, identified emergency procedures and visibly listed emergency telephone numbers;
4. Procedures for allowing effective communication, applications inventory and business recovery priority and hardware and software vendor list;
5. Confirmation of updated system and operations documentation;
6. Process for frequent backup of systems and data;
7. Off-site storage of system and data backups;
8. Ability to recovery data and systems from backup files;
9. Designated recovery options which may include use of a hot or cold site;
10. Evidence that disaster recovery tests or drills have been performed.
